

MaxPowerLine Card

Uninterruptible Power Systems (UPSs)

MaxPower offers a wide variety of single- and three-phase UPSs ranging from 500 VA to 750 kVA in standby, line-interactive, online and ferroresonant topologies. Our comprehensive offering of UPSs meets the needs of virtually any application, while our significant stock (up to 100 kVA) ensures quick shipment and delivery for your customers.

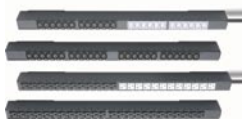

Modular UPSs

MaxPower offers both single and three-phase modular uninterruptible power systems. Our products range from 3 to 18 kVA single-phase and from 10 to 100 kVA three-phase.

Modular Air Conditioning

Move It. Hang It. Rack It. Stack It. **MaxPower's** CoolCube 10 is the industry's only modular air conditioning unit. Save valuable floor space by rack-mounting the 10,000 Btu/h unit, hanging it from a drop ceiling or placing it on a shelf — or stack multiple units for increased capacity or redundancy (up to 40,000 Btu/h). Compact, cost-effective design is ideal for IT environments.

Cabinet Distribution Units

Designed to meet the complex requirements of today's IT and data center environments, Server Technology's Sentry family of Cabinet Distribution Units (CDUs) delivers SNMP-based solutions that monitor, track and manage servers and IT equipment, and the cabinet infrastructure that houses them.

Fail-Safe Transfer Switches

Providing 30-amp redundant power for single-power device, Server Technology's Sentry Fail-Safe Transfer Switch (FSTS) features two input power feeds from separate AC circuits, which deliver dual, redundant power sources.

Power Distribution Systems

MaxPower's MaxTrax makes electrical and power distribution a breeze. This cost-effective, reliable and scalable system offers a build-as-you-need-it approach, in which the track system is discreetly run overhead or along the floor. A wide variety of plug-in receptacle modules snap easily into the track.

Maintenance Bypass Panels

Multiple configurations of Eaton Cutler-Hammer maintenance bypass panels are available ranging from 40A to 800A and in 2- and 3-breaker configurations. Options include 480-208/120V Transformers, Solenoid Key Release Units, Key Interlocks, Auxiliary Contacts, and Distribution Breakers. Multiple configurations including rotary switch bypasses are available from stock.

Replacement Batteries

MaxPower offers replacement batteries that are compatible with all manufacturers' UPSs. We also offer Custom Cabinet Enclosed Battery Systems to achieve extended runtimes with all UPS systems. Unlike competitors, our battery solutions come with a full 3-year warranty.

MaxPower is the master distributor for Eaton Powerware, Toshiba, Legacy Power Conversion, Gamatronic, and XPC.
