

## Ferroresonant Power Protection

Legacy Power Conversion manufactures the rugged and highly configurable Herytage ferroresonant UPS in Necedah, Wisconsin

# Herytage

FERRORESONANT UPS / MODELS FROM 2kVA/1.6kW TO 20kVA/16kW

Herytage uninterruptible power systems provide power filtering, cleaning, output regulation and harmonics filtering without using batteries for most sags and brownouts—and they do so at a higher efficiency and lower cost than other ferroresonant brands.

# Why Herytage?

- **High output watt rating** (.80 power factor) allows selections of smaller kVA size
- **Higher AC efficiency** at full and partial loads – up to 93%
- **Galvanic isolation** separates input from output making this UPS an exceptional choice for harsh electrical environments
- **Highly configurable** – wide range of runtimes, charger options, line cords and receptacles
- **10 year UPS warranty** including 3 year full UPS and battery plus an additional 7 years pro-rated on the entire unit

# Herytage is designed for serviceability

- Easy access and board-level repairs
- Service by trained resellers, qualified end users or factory
